

3rd International Conference on
PSYCHOLOGY AND MENTAL HEALTH
November 16-17, 2023 | Dubai, UAE

TITLE: The problem of achieving economic stability by examining the relationship between the three: inflation, unemployment, and economic growth

Name: Mahfoud Handaoui

Affiliation: Assistant Professor at Chlef University

Country: Algeria

Email ID: handaoui.mahfoud@gmail.com

ABSTRACT (upto 300 words)

This research aims to identify the relationship between inflation, unemployment, and economic growth in Algeria during the period 1990-2021, by addressing some previous studies, using the descriptive approach, and analyzing the impact of variables in Algeria in addition to the experimental approach in measuring this relationship using the VAR methodology. The study concluded that there is a direct, significant, causal relationship between the variables of the study in the Algerian economy during the period 1990-2021 that contribute to achieving a balance that translates into economic stability in the country through increasing growth rates and reducing both unemployment and inflation, in addition to the absence of a common integration relationship between them.

BIOGRAPHY (upto 300 words)
